Future-Oriented Innovation Fields

Biological surfaces and interfaces concern the field where synthetic materials and biological systems interact with each other - a topic that constitutes one of the most innovative and expanding fields in science and technology for the optimization of the clinical outcome.

The conference will cover a number of priority session topics that are currently attracting a lot of interest in both the bio-oriented community of scientists, engineers, clinicians and industry as well as society at large, often with controversial opinions on both technical and societal aspects.

- Lectures by top-notch international speakers from academia & industry
- Pre-Conference Seminar with introductory lectures on relevant scientific and technological topics
- Exhibition with technology providers active in life-sciences

Media

Biointerfaces International Zurich 2021 uses social media outlets to engage with our partners and friends to keep everybody informed about all ongoing activities and to ensure that we are well connected with our communities.

The website of Biointerfaces International Zurich 2021 shows a wide range of up to date information. Launches of announcements with programmes, deadlines and many more information in regular periods .

Why become a sponsor

There are several sponsorship opportunities available at the BioInterfaces International Zurich 2021 Conference. A sponsorship is an excellent way to provide publicity for your organization to all our participants.
